

## Phoenix Pathology COVID-19 Testing

Phoenix Hospital Group offers two highly accurate COVID-19 tests (Antibody and Antigen PCR swab) providing results quickly and efficiently. Both tests are approved by Public Health England for use in the NHS and private laboratories.

### COVID-19 Antibody Test

Highly accurate, sensitive and specific COVID-19 antibody test which assesses whether there are antibodies present in the blood, therefore showing if the patient has had COVID-19 in the past.

This is a fully automated test performed in our Private Harley Street laboratory and developed by the leading healthcare company, *Abbott Diagnostics*.

**Price:** £79

**Turnaround time** = 4 hours if sample is received by 4pm.

**Sample collection** = As this is a blood test, sample collection via our registered nurses can be arranged at 25 Harley Street. The results can be sent back to your GP or confirmed via our in-house GP and sent directly back to you for an additional £20.

### COVID-19 PCR Nasopharyngeal Swab

Highly accurate, sensitive and specific COVID-19 Nasopharyngeal Swab test which assesses whether the person is currently infected.

**Price:** £175

**Turnaround time** = 24 hours if sample is received by 4pm.

**Sample collection** = The PCR test requires a swab collection. An appointment can be arranged for the nasal swab at 25 Harley Street with our registered nurses. Alternatively, a self-collection kit can be sent to the patients' home. Once the sample has been processed the results will be confirmed by our in-house GP and sent back to you via email.

## Important Notice

Should you wish to arrange for large numbers of your staff to receive tests corporate discount rates can be arranged.

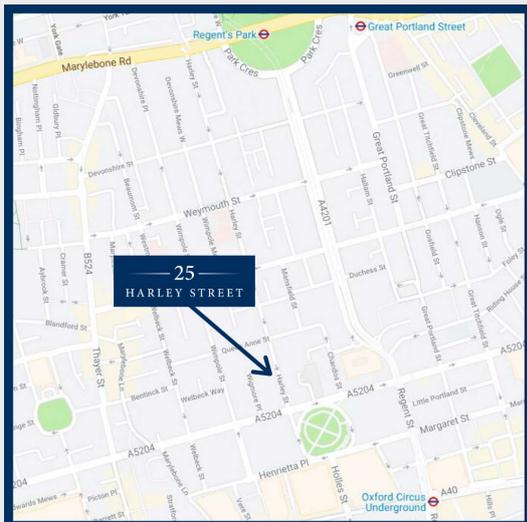

Please note that we can only accept patients in our premises that are asymptomatic and are not suspected to have COVID-19. All patients are required to wear a facemask and we will need to take their temperature upon arrival.

Please note that swab self-collection kits should only be requested if the patients are able to correctly follow the instructions provided in the kit. If swabs are not collected appropriately this may cause false negative results.

The sample collection takes place in our outpatient centre at 25 Harley Street. This centre is quiet, discrete and our teams have maintained the highest level of sanitation and infection control.

## How to Find Us

25 Harley Street is located on the world famous Harley Street, close to the junction of Cavendish Square at the rear entrance to the John Lewis department store. It is a short walking distance from Regent's Street, Oxford Street and Marylebone High Street.

### **25 Harley Street, London W1G 9QW**

We recommend that patients use public transport to reach 25 Harley Street; However if you do wish to drive, there is metered parking on Harley Street and two NCP car parks located at Welbeck Street and Harley Street.
