

Consultant and Services Directory

Welcome

I am thrilled to present the latest version of the Phoenix Hospital Group Consultants and Services Directory. Within this directory, you'll discover comprehensive details regarding our facilities, offered services, and esteemed Consultants and Specialists. Additionally, we've included pertinent information about primary contacts and the patient referral process.

Phoenix's ongoing expansion of locations and service offerings brings us immense joy as we witness our remarkable progress.

Our facilities are backed by an ever-growing network of medical Specialists, each a pinnacle of expertise in their respective domains. The commendable feedback from our patients attests to the quality of care we provide.

Should you have inquiries about our group or require any form of assistance, please don't hesitate to reach out to me using the email provided below. I would like to seize this moment to express my gratitude for your unwavering support.

With very best wishes

Phoenix Health Screening

At Phoenix Hospital Group, we aim to provide comprehensive health screening choices, whilst avoiding unnecessary tests and expense. Our health screening can identify medical issues before they start to cause symptoms. If any further tests or management is needed, your care can be seamlessly referred to our Specialist Consultants.

All medical screening investigations have strengths and limitations, therefore the combination of tests we offer are a guide only. Our Doctors will discuss your individual concerns with you to adopt a personalised medicine approach and recommend the investigations most suitable for you.

Our extensive range of screening tests will provide you with a full assessment of your health and well-being. Conducted by experienced private screening GPs and supplemented with world class diagnostic equipment, our packages are designed to detect most major illnesses and conditions.

Early Detection of Cancer

We are one of the few centres to offer virtual colonoscopy. A virtual colonoscopy requires no sedation and it can be used to help diagnose health conditions such as bowel cancer, which is the third most common cancer in men and second most common cancer in women in the UK. The radiologist gains information about the other organs inside your abdomen when using virtual colonoscopy, which cannot be achieved with a conventional colonoscopy.

We also offer whole body, diffusion weighted MRI scanning which assesses for Cancer tumours up to 3mm in size across the whole body. This scan requires no harmful radiation or injected contrast dye and is completed within 1 hour.
