Phoenix Health Screening

At Phoenix Hospital Group, we aim to provide comprehensive health screening choices, whilst avoiding unnecessary tests and expense. Our health screening can identify medical issues before they start to cause symptoms. If any further tests or management is needed, your care can be seamlessly referred to our Specialist Consultants.

All medical screening investigations have strengths and limitations, therefore the combination of tests we offer area guide only. Our Doctors will discuss your individual concerns with you to adopt a personalised medicine approach and recommend the investigations most suitable for you.

Our extensive range of screening tests will provide you with a full assessment of your health and well-being. Conducted by experienced private screening GPs and supplemented with world class diagnostic equipment, our packages are designed to detect most major illnesses and conditions.

Early Detection of Cancer

We are one of the few centres to offer virtual colonoscopy. A virtual colonoscopy requires no sedation and it can be used to help diagnose health conditions such as bowel cancer, which is the third most common cancer in men and second most common cancer in women in the UK. The radiologist gains information about the other organs inside your abdomen when using virtual colonoscopy, which cannot be achieved with a conventional colonoscopy.

We also offer whole body, diffusion weighted MRI scanning which assesses for Cancer tumours up to 3mm in size across the whole body. This scan requires no harmful radiation or injected contrast dye and is completed within 1 hour.

A female healthcare worker with dark hair tied back, wearing light blue scrubs and blue gloves, is smiling warmly at a patient. The patient, seen from the back, has long dark hair and is wearing a white long-sleeved shirt and a dark skirt. They are in a clinical setting, possibly a laboratory or examination room, with a mirror on the wall reflecting a microscope and a sink with a hand sanitizer dispenser. A blue tray with medical supplies is visible in the foreground.
